## WHY THEY INVOLVE IN THIS PROJECT

**Project Developers:**  
The founders of V.I.X.E.V.I.A that makes exist right now.

**Google Cloud Platform:**  
Provides the infrastructure and tools, such as the Google Gemini model.

**User and Community:**  
The end-users and Weebs community play a role in testing and providing feedback.

**Open Source:**  
Being an open-source project under the MIT license external developers can access and contribute.

**Hardware Provider:**  
Essential for providing the GPU and other hardware components needed to run the complex AI processes and ensure smooth rendering and real-time functionality of her.
